Education

Datta Meghe College of Engineering **Navi-Mumbai, India**
Bachelor of Engineering in Artificial Intelligence & Data Science *2023 – 2027*

Technical Skills

Programming Languages: Python, SQL, R, Java, C, JavaScript
AI & ML: Machine Learning, Deep Learning, Neural Networks, Scikit-learn, Transformers (Hugging Face), XGBoost
Data Science: Pandas, NumPy, Power BI, SPSS
Databases: MySQL
Tools & Technologies: Git, GitHub, Google Cloud Platform, Figma
Web Development: HTML, CSS, Bootstrap, React

Experience

Krawlnet Technologies **June 2025 – July 2025**
AI Developer Intern *On-site*

- Engineered data preprocessing pipelines for large textual datasets to support NLP model training and evaluation.
- Fine-tuned BERT-based transformer models using Hugging Face Transformers through hyperparameter optimization and experimentation.
- Evaluated text classification models using accuracy, precision, recall, and F1-score to assess model performance.

Sponzo Pvt. Ltd. **Dec 2025 – Jan 2026**
Full Stack Developer Intern *Remote*

- Developed and deployed the company production website, delivering a responsive experience across desktop and mobile devices.
- Integrated backend APIs, improved UI responsiveness, and managed deployment on Render.

Projects

Campus Signal | *React, Spring Boot, Java, PostgreSQL, REST APIs* **Jan 2026 – May 2026**

- Built a campus grievance platform with structured issue reporting, automated tracking workflows, and secure database management.

Obsidian Watch: AI Fraud Detection | *Python, Scikit-learn, XGBoost* **Aug 2025 – Nov 2025**

- Developed a financial fraud detection system using feature engineering and XGBoost to flag suspicious transaction patterns and reduce false positives.

CodeLens | *React, FastAPI, Gemini API* **Feb 2025 – Mar 2025**

- Built an AI code explanation platform using React, FastAPI, and Gemini API to explain source code, visualize execution flow, and debug errors.
- Implemented persistent authentication, snippet management, and cloud logic.

Heart Disease Prediction | *Python, Scikit-learn, React* **Jan 2025 – May 2025**

- Engineered and evaluated supervised machine learning models to predict heart disease risk from clinical patient data using preprocessing, feature engineering, and metric evaluation.

Achievements

- **Technical Head (E-Cell, DMCE):** Oversaw technical operations and led full-stack development for official E-Cell and ENSPIRE web applications. **May 2025 – June 2026**
- **Campus Ambassador (IIT Bombay E-Cell):** Promoted entrepreneurship initiatives and drove outreach across campus. **May 2025 – Jan 2026**
- **Hackathon Finalist:** Reached Top 50 out of 300+ competing teams in The Great Ninja Hack.
- **Certification:** NPTEL Python for Data Science (IIT Madras), score: 65.
